NOTES

Key: CSII = continuous subcutaneous insulin infusion

¹Recombinant (using *E. coli*)

²Recombinant (using *S. cerevisiae*)

³Recombinant human insulin analogue (using *E. coli*)

⁴IV to be used in a clinical setting under proper medical supervision

⁵IV and CSII administration for Humalog U-100 only.

Onset for injectable formulations is always for the SC route. All times are approximate. Maximum effect occurs between hours listed in duration column; actual effect may last longer. Injectable insulins listed are available in a concentration of 100Units/ml; Humulin R, in a concentration of 500Units/ml. for SC injection only, is available by prescription from Lilly for insulin resistant patients who are hospitalized or under close medical supervision.

Not an inclusive list of medications and/or dosing instructions. Please see drug monograph at www.eMPR.com and/or contact company for full drug labeling.
