NOTES

Key: MPA = medroxyprogesterone acetate.

Matrix patch: Estradiol is embedded in the adhesive layer that is applied directly to the skin.

Reservoir patch: Estradiol is contained in a drug reservoir and its release is controlled by a co-polymer membrane; contains more layers than matrix patch. Not an inclusive list of medications and/or official indications. Please see drug monograph at www.eMPR.com and/or contact company for full drug labeling. Estrogen component is listed first for combination products. Listed strengths are not necessarily the same as the dosage. Listed dosing frequency is for use in HRT; may be other frequencies for other uses. Some products are given cyclically.
